Atlanta, Georgia • +1-470-452-2355 • dchadha7@gatech.edu • linkedin.com/in/dikshantchadha

EDUCATION

Georgia Institute of Technology, Atlanta, Georgia

M.S. in Analytics

Aug 2026 - Dec 2027

Relevant Coursework: Analytical Modeling, Machine Learning, Data and Visual Analytics, Parallel Computing, Business Analytics, AI in Business Practicum

Thapar Institute of Engineering and Technology, India

B.S. in Electronics and Communication Engineering | CGPA 8.5/10

Jul 2016 - Jun 2020

SKILLS

Programming: Python, SQL, R, C++, Java, Bash

Data & ML: Pandas, NumPy, SciPy, scikit-learn, PyTorch, TensorFlow

Analytics: Statistical Modelling, Regression, Optimization, Simulation, Time Series, Machine Learning

Technologies: Tableau, Power BI, Excel, Git, Jira, Linux, Docker, Jenkins

WORK EXPERIENCE

Qualcomm Bangalore, India

Senior Program Analyst, Program Management (PM) Team

Jul 2025 - Aug 2026

- Built a Python tool to automate demand planning, resource allocation, and capacity planning across 50+ modem system programs, reducing the manual effort by 50%
- Integrated AI model and Power Automate workflows in the existing PM tools to automate data retrieval from the distributed project databases, resulting in a 5x increase in tool usage and enabling adoption among PM teams across organization
- Coordinated program data across engineering teams and projects while overseeing 3 indirect reports

Qualcomm Noida, India

Software Engineer, Software R&D Team

Jul 2022 - Jul 2025

- Developed the Qualcomm Multimedia Software Development Kit (QIMSDK) to enable AI use cases on mid-tier industrial chips
- Redesigned an ML testing tool to enable ONNX operators across Qualcomm Models, reducing testing time by 20%
- Improved user onboarding workflows for Qualcomm 5G asset-tracking products

Samsung R&D Center Noida, India

Software Engineer & Intern, Display Team

Jan 2021 - Jul 2022

- Engineered display drivers for Samsung smartphones using C/C++, supporting feature development and research for next-generation display technologies
- Created an augmented-reality video calling feature that reduced bandwidth consumption by 40% while reconstructing lost facial expressions from metadata

PROJECT EXPERIENCE

Autonomous Program Management Engine (Python | LLMs | RAG | Vector Search | Agentic AI)

- Built an AI powered engineering assistant that combined 50k+ technical documents, milestone records and program reports using RAG and vector search to generate context aware program summaries and reports

Smart Label Partner Onboarding Tool (C++ | Modem | Python | Simulation | Azure)

- Enhanced an Azure hosted partner integration pipeline, reducing onboarding time by 80%, and added simulation environment that enabled customers to validate use cases and workflows before hardware arrival, accelerating integration

LEADERSHIP / VOLUNTEER

Customer Solution Lead: Led 4-month on-site customer experience engagement in San Deigo, coordinating stakeholders

Code the Dream (Coding Mentor): Head Coach for Python programming classes, mentoring undergraduate students

UN Volunteer: Selected as UN SDG Volunteer; led 2-month projects in Cairo, Egypt and Wroclaw, Poland
